B35 Bio Clean Biological cleaner for hard surfaces

How to use

The unique blend of bacteria in Bio Clean continues to work long after application. When Bio Clean is used regularly, you will help to establish a powerful bacterial action that over time will help reduce the amount of Bio Clean you need to use.

Dilute at 1 part Bio Clean to 1 part water. For best results, dilute with warm water.

To clean floors, urinals, toilets, sinks and showers: apply to surfaces, wipe and leave to dry naturally.

To eliminate drain line odours: apply one squirt nightly to the drain line.

To remove organic & urine stains on carpets and textiles: wet surface with warm water, apply and leave to dry.

NB: When using Bio Clean, avoid using in conjunction with bleach, caustic / alkaline based products or disinfectants as they will affect its performance.

Where to use

##Bio Clean is suitable for use on all surfaces and all areas, including kitchens and washrooms.

##Suitable for use on carpets, linoleum, laminate, wood floors, showers, toilets, sinks, tiles, table-tops, work-tops, ovens, etc.

##Ideal for use on mattresses (in conjunction with our biological odour remover Bio ONA).
