

FAT OIL AND GREASE DEGRADER EU60 RTU

Liquid – Non Hazardous product - Ready to use

EU60 is a specially formulated biological product designed for the maintenance of drain lines, pipes and grease traps serving the catering and food manufacturing industry. It is also designed for use in sewers and pumping wells.

The product contains harmless, naturally occurring micro-organisms selected for their ability to produce enzymes capable of degrading oils, fats and greases commonly found in drains, grease traps, drain lines and sewers. They also produce enzyme complexes for the breakdown of other waste materials including starch, protein and vegetable matter.

EU60 also contains selected surfactants that aid in the emulsification of grease, making it more available to the microorganisms to digest. The product contains other specific ingredients designed to stabilise the product, to allow problem-free pumping in automatic dispensers and to maximise the biodegradation of grease.

**Do your pipes and grease trap look like this?
Even with the cover on you can probably smell it.
This can easily be prevented with cost effective regular maintenance.**

EU60

- Reduces pumping problems
- Reduces or eliminates odour problems
- Maintains free flowing drain lines
- Improves hygiene standards
- Reduces maintenance costs

EU60 Specification

Form: Liquid
Colour: Green
Scent: Lemon
Coliforms: 0/ml
Salmonella: 0/ml
Pack size: 5 and 25 Litre

Application rates

EU60 Green with Lemon fragrance, for daily maintenance.

Small restaurants or Hotels	50 ml per day
Larger restaurants	100 ml per day
Fast food outlets	150 to 200 ml per day

EU60 has been designed for either automatic dosing or by hand into the required point of application. For best performance the product should be applied at times of low flow into the sink furthest away from the drains. This will keep the pipes and drains unclogged and odour free. Hot water should not be used immediately before or after dosing. Harsh chemicals such as caustic or bleaches should not be used with this product.

EU60 is safe for people, animals and the environment and is completely biodegradable.
