Biological cleaner for Toilets, Sink and Waste Pipes EU95

Dramatically reduces lime scale and uric acid deposits

Removes organic waste and foul odours. Ideal for both hard surfaces and porous flooring

Fast acting ready to use product - Neutral pH containing friendly bacteria and specially selected enzymes.

Most cleaning products stop working within minutes of application resulting in a build of off foul smells and blockages. EU95 continues to work every minute of the day more thoroughly and deeply compared to conventional cleaning products to leave a fresh and improved environment.

EU95 is a specially formulated biological product and scale inhibitor designed for the regular maintenance and cleaning of toilets, urinals, sinks and waste pipes.

The product contains harmless, naturally occurring saprophytic micro-organisms selected for their ability to produce enzymes capable of degrading a wide range of organic waste.

Low level surfactants aid in the emulsification of waste and reduce surface tension to improve product penetration and cleaning performance. This allows the reduced use of cleaning products containing hazardous chemicals such as acids, caustics, bleaches and disinfectants.

The product is fully stabilised with a guaranteed two year shelf life, designed to allow problem-free pumping in automatic dispensers and maximise the biodegradation of grease and other organic waste.

EU95

- Reduces or eliminates odour problems
- Maintains free flowing drain lines
- Improves hygiene standards
- Works above and below the water line to reduce scale and unpleasant odours.
- Does not contain harsh chemicals.
- Reduces maintenance costs
-

EU95 is safe for people and the environment. It is completely biodegradable.

EU95 has been designed for automatic dosing into the required point of application. For best performance the product should be applied at times of low flow. Hot water should not be used immediately before or after dosing. Harsh chemicals such as caustic or bleaches should not be used with this product.

Directions for use:

Urinals and Toilets: Use daily undiluted by spraying the surfaces, leave for ten minutes, scrub than flush.

Floors and tiled surfaces: Dilute 10:1 mop and leave to dry

Drains: Dilute 5:1 for normal use or undiluted if heavy soiling, 10ml per meter run of drain.

Sinks and Shower basins: Use undiluted at 20ml per day

EU95 Specification

Form: Liquid

Colour: Green

Scent: Lemon

Pack size: 5 and 25 Litre
