

BIO BLOCK

Biological Fat & Grease Treatment

Slow-Release Biological Treatment for Fats & Grease

Bio Block is a water-soluble, slow-dissolving treatment designed to break down fat, grease, and organic waste in high-flow water systems, hard-to-reach areas, and isolated locations.

Bio Block

Biological Fat & Grease Treatment

Slow-Release Biological Treatment for Grease & Fat Control

Bio Block is a water-soluble, slow-dissolving treatment designed to break down fat, grease, and organic waste in high-flow water systems, hard-to-reach areas, and isolated locations.

Unlike manual dosing or mechanical systems, Bio Block releases bacteria gradually over 30–90 days, ensuring continuous and effective treatment.

Specifications

Form: 5kg water-soluble block

Colour: Red

Fragrance: Cherry

Pack Size: 4 x 5kg per box, 1 x 20kg per box

Compatible with liquid biological maintenance products for enhanced performance in high-loading situations.

Storage Conditions:

Store in a cool, dry place

Safe, biodegradable, and harmless to people, animals, and the environment when used as directed.

Key Benefits

- ✓ Continuous fat and grease breakdown with slow-release technology.
- ✓ Eliminates the need for daily manual dosing.
- ✓ No expensive mechanical dosing equipment required.
- ✓ Reduces foul odours, including hydrogen sulphide and mercaptans.
- ✓ Safe, biodegradable, and easy to install.

How it Works

Bio Block contains high-performance bacteria that break down fats, grease, and organic waste over time. The slow-release formulation:

- Keeps bacteria in the target area, ensuring long-lasting treatment.
- Prevents fat and grease buildup, maintaining system efficiency.
- Reduces blockages, foul odours, and maintenance costs.

Easy & Cost-Effective Installation

- Simply suspend the block into the water flow.
- Works in multiple areas of varying flow, including connecting drains and sewer systems.
- Ideal for locations with difficult access or where regular dosing is impractical.

Applications

- Grease traps
- Collection tanks
- Pumping stations
- Wastewater treatment plants
- Settlement lagoons
- Interceptor tanks
